

BAR 175

DESCRIPTION

The material of the modern street cleaning cart **BAR-175** is a steel structure and a trash can of medium-density polyethylene. Its density complies with the highest fluidity conditions and has high resistance to hits and bumps. It's manufactured through a rotational molding process.

- Its UV protection guarantees less wear and tear.
- The street cleaning cart has two pieces: body and lid.
- The lid, slightly larger than the body, achieves hermetic sealing; this prevents the leakage of bad odors and sources of infection and water from entering.
- Its body has a smooth interior and rounded corners that avoid the accumulation of residues.
- The tubular structure has two rear wheels of 10" fixed to an axle and one front caster wheel of 4" for easy transportation.
- The structure has dual protection against corrosion.
- It includes a shovel and a broom.
- Low costs of investment and maintenance.
- It's manufactured under international norms and standards for working with an automated waste collection system.

FUNCTIONALITY

The street cleaning cart **BAR-175** design makes for an easy manual or automatic transfer of residues.

- Since it doesn't have edges or defects, it facilitates cleaning and discharge.
- Avoids bad odors and sources of infection.

CUSTOMIZATION

We can label it with the legend of the type of material or your logo according to your needs.

FEATURES

COLORS:

Trash can: Orange.

Structure: Yellow.

CAPACITY: 175 L (46.2 US gal).

WEIGHT: 45.65 lb.

MEASURES:

Width: 27.3 in.

Length: 4 ft 2 in.

Height: 3 ft 4 in.
