

# STREET CLEANING CART ELITE

## DESCRIPTION

The material of the modern street cleaning cart **BAR-200** is medium-density polyethylene through a rotational molding process for better resistance to waste load and impacts. The material of the lid is HDPE through an injection molding process.

- Two rear wheels of 12" fixed to an axle and two front wheels of 6" fixed to an axle for easy transportation.
- UV protection.
- The lid covers the waste from the elements like rain or the sun to avoid accelerating its decomposition.
- It has a handle for better control of the cart.
- Its design has space up front for a shovel and two brooms.
- It has a container in its interior to facilitate the waste collection and discharge.
- It includes a shovel and a broom.

## CUSTOMIZATION

We can label it with the legend of the type of material or your logo according to your needs.

## FUNCTIONALITY

- The **BAR-200** is perfect for trash collection, helping the environment, and keeping public spaces clean.
- Easy to discharge.
