

WASTE CONTAINER VIC-1900

DESCRIPTION

The material of the waste container **VIC-1900** is medium-density polyethylene that gathers the highest resistance to hits and breaks. It's manufactured through a rotational molding process.

- Heavy duty.
- UV protection.
- It has three parts: a body and two lids.
- The lids, slightly larger than the body, prevent the leakage of bad odors, sources of infection, and water from entering.
- It has two pickup pockets on the sides for lifting and discharging the garbage truck.
- Its body has rounded corners that avoid the accumulation of residues.
- It has four caster wheels of Ø 8" that improve its transportation.
- Low costs of investment and maintenance.
- It's manufactured under international norms and standards for working with an automated waste collection system.

FUNCTIONALITY

- The design of the waste container **VIC-1900** makes for an easy manual or automatic transfer of residues.
- Any lift system can discharge the waste.
- Since it doesn't have edges or defects, it facilitates the cleaning and discharge of waste.

CUSTOMIZATION

We can label it with the legend of the type of material or your logo according to your needs.

FEATURES

CAPACITY: 1900 L (501 US gal).

WEIGHT: 246.4 lb.

WASTE CONTAINER COLOR CODING:

- | | |
|---|---|
| grn Organic: Food, fruits, and vegetables. | bl Plastic: Bottles. |
| gr Inorganic: Fabric, shoes, boxes, etc. | rd Bio hazardous and biomedical. |

MEASURES:

Length: 6 ft 7 in.
Width: 3 ft
Height: 4 ft 6 in.

Volumes, dimensions, and other measures are nominal and may vary by approximately 2 %.
