

WASTE CONTAINER VIC-660 HD

DESCRIPTION

The material of the waste container **VIC-660 HD** is HDPE which gathers the highest conditions of resistance to hits and breaks. It's specially made for the deposit of solid waste. Manufactured through an injection molding process which allows producing the body in one piece, this helps avoid stress or breaking points.

- UV protection.
- Its body has a smooth interior and rounded corners that avoid the accumulation of residues.
- The central drain plug on the bottom has a rubber O ring for hermetic sealing.
- The reinforced structural pickup pockets facilitate the disposal of waste through a lift system.
- The design of the flat lid with structural reliefs and a smooth interior without edges prevents the leakage of bad odors and sources of infection and water from entering.
- It has four rubber caster wheels of 7.8 in. Ø mounted over polypropylene rims and a metallic swivel base (360°) with a galvanized finish to avoid corrosion. Two of the wheels have brakes to stop the container.
- The body has four handles and a tab for easy maneuver. In addition, the lid has five tabs to open it.
- It has resistance to extreme temperatures, for which you can place it outdoors or indoors.
- It has resistance to chemical reagents.
- Low costs of investment and maintenance.
- It complies with the EN 840-2/5/6, RAL-GZ 951, AfPS-GS., and DIN 30700 standards.

CUSTOMIZATION

We can label it with the legend of the type of material or your logo according to your needs.

FEATURES

CAPACITY: 660 L (174 US gal)

WEIGHT EMPTY: 88 lb.

MAXIMUM LOAD: 668.8 lb.

WASTE CONTAINER COLOR CODING:

grn Dark green

MEASURES:

Length: 4 ft 5 in.

Width: 30.42 in.

Height: 3 ft 10 in.

Volumes, dimensions, and other measures are nominal and may vary by approximately 2 %.
